PROFILE

I believe in the power of positive thinking, which enables me to understand the world around me and grow with it. My selfless, self-motivated nature keeps me relentlessly committed to mastering skills one resourceful step at a time, and to creating incredible things.

DEVELOPMENT

General Assembly | WDIR TA/Homework Grader

Feb. 2017 - present

I grade student homework, offering insightful feedback and guidance. As a TA, I meet with students via video chat and Slack to offer guidance and resources for homework and project development. My TA queue is managed using a customized SlackBot.

General Assembly | Web Development Immersive Remote Student

Oct. 2016 - Feb. 2017

In this intensive, fully immersive program, I lived and breathed code, all day, every day, for 80-100 hours per week. I internalized both front-end and back-end web development; I can navigate, debug, and create thoughtful front-end code using HTML5, CSS3, Javascript, jQuery, Angular.js, and Ruby. I am also proficient in back-end development using Ruby on Rails, Node.js, Express.js, CRUD functionality with RESTful routing, MongoDB, Mongoose, and PostgreSQL.

HR & PROJECT MANAGEMENT

KPMG | Partner Services Coordinator (Temporary)

Feb. 2016 - Oct. 2016

Regeneron Pharmaceuticals | Talent Acquisition Coordinator (Temporary)

Feb. 2016 - Oct. 2016

Deloitte | Campus Recruiter (promoted from Campus Recruiting Coordinator)

Mar. 2012 - May 2013

Inktel Contact Center Solutions | Talent Acquisition Associate (promoted from Talent Acquisition Intern)

Jan. 2011 - Mar. 2012

TEACHING

MASA Israel Teaching Fellows | Elementary School Teaching Fellow (Volunteer)

Jan. 2011 - Mar. 2012

SKILLS

JavaScript	Node.js	Rails
jQuery	Express.js	SQL
HTML	Angular.js	PostgreSQL
CSS	MongoDB	NoSQL databases
Bootstrap	Mongoose	Third-Party APIs
Materialize	Ruby	Git/GitHub

PROJECTS

WorkIt

Built a full-stack, secure application made to track a user's workouts by type. The interactive calendar is built with an Angular.js front end and a Rails 5 API back end supported by a PostgreSQL database. User authentication is implemented via bcrypt and JSON web tokens.

Rcp

Built a secure, password-protected Ruby on Rails application with full CRUD functionality using a PostgreSQL database. User authentication is implemented via password-hashing and JSON web tokens.

Endeavor

Built a full-stack MEAN application in a team project environment. The app implements CRUD functionality by consuming a third-party API and a RESTful Node.js API. The front-end is built with Angular.js. MongoDB stores application data.

Cheerups

Built a full-stack, password-protected MVC social media platform using Node.js and Express.js. The app employs two models with full CRUD functionality; data is stored on a MongoDB database and deployed on Heroku.

BlackJack

Built an interactive BlackJack application using an object-oriented programming approach. The app is built using HTML, CSS, JavaScript, and jQuery.

EDUCATION

Columbia University | New York, New York

BA, French & Francophone Studies

2007 - 2010

University of Miami | Coral Gables, Florida

Post-Baccalaureate Pre-Medical Certificate

2013 - 2014

INTERESTS

Snowboarding

Running mud races

Creatively reusing leftovers
